

BIOGRAPHY

Kevin Mabie, **President and CEO** **Valador**

Prior to founding Valador in the summer of 2001, Kevin Mabie, spent over 24 years supporting Aerospace, Information Security, Modeling and Simulation applications. Mr. Mabie spent 12 years on active duty in the U.S. Navy as a Radar Intercept Officer in the F-14 program. While on Active duty, Mr. Mabie was a Top Gun graduate and an Aeronautical Engineering Duty Officer. After leaving the Navy, Mr. Mabie remained involved with DoD from the industry side through the development of advanced weapons software and both onboard and ground-based information systems.

Mr. Mabie grew from program management to executive leadership positions where he specialized in managing large programs emphasizing Modeling and Simulation as a critical part of the entire engineering process. Mr. Mabie has managed and delivered information security solutions, integrated communications systems, turnkey 24x7 network security facilities, integrated models, and tactical embedded software for over 15 aircraft and weapon programs. This expertise lead to Mr. Mabie founding the first commercial 24x7 network security company, Veritect, and subsequent promotion to lead the sales and marketing organization for the Veridian Corporation, a company with almost \$1B in annual sales. Mr. Mabie holds a Masters Degree in Space Operations from the Naval Postgraduate School in Monterey, CA.
